

HAMZA GORCEVIC

Full Stack DEVELOPER

P : 062-8967329

A : Novi Pazar, Serbia

E : hamzagorcevic100@gmail.com

PROFILE

Ambitious Software Engineer with a strong passion for coding and problem-solving. Proficient in building Full-Stack web applications using backend technologies such as ASP.NET, FastAPI, and Node.js, and frontend frameworks like React, Angular, and my favorite—Vanilla JS with HTML. Additionally, experienced in developing WPF desktop applications, leveraging C# and .NET to build robust and user-friendly software solutions.

EDUCATION

Bachelor degree

Currently student at State University of Novi Pazar (Software engineer)

[CentarNit certificate](#)

Certifacte for web development

[DeepLearning.AI Stanford University](#)

Cerificate for machine learning

SKILLS

- Asp.Net
- FastApi
- Node.js
- React.js
- Angular
- Next.js
- Laravel

- Git

WORK EXPERIENCE

Full Stack Developer | [Turist Agent](#)

2023-2024

- Developed Turist Agent, an application for tourist agencies to streamline their business processes.
- Collaborated with a team of senior software engineers on the development of three key components:
- Zephyr (admin application): Managed user accounts, agencies, and system configurations.
- Ekko (main application): Implemented core functionalities including contract creation, payment management, and travel planning.
- Website: Developed the marketing website to showcase the app's features to potential clients.

Technologies:

- Frontend: Angular, React, Next.js
- Backend: ASP.NET

Full Stack Developer | [Moj NP \(Supported by City Government and Centar Nit\)](#)

2022-2023

- Developed Moj NP, an application providing citizens of Novi Pazar with automated updates on city events, government announcements, cultural activities, and competitions.
- Built automation systems to scrape data from various government websites, centralizing information related to Novi Pazar.
- Collaborated with the city government and Centar Nit organization to ensure the app provided accurate and up-to-date information.

Technologies:

- Frontend: React, Next.js
- Backend: FastAPI
- Other Tools: Web scraping techniques, REST APIs
